11 The answer is one long ago
made in San Francisco and other cities on
the Pacific slope, and was decided in the
negative. When once they have occupied
a building it is difficult to rent it to people
of another race. Even Italians will shun of another race. Even Italians will shun quarters which once have been occupied by Chinamen. In fact, the landlord who rents to Chinamen is soon at the tenants'

> They may pay good rent at first, but when they have occupied a place so long that no one else would take it, they demand a lower rate. The landlord yields or his building stands empty. The Chinese colony, as it is just beginning in New York city, has been shown in cities and towns of the West to be properly comparable with a malignant ulcer. The Chinese colony eats its way into the body politic and is as de-structive of real estate interests as the ulcer is destructive of the living tissues. Chinese tenantcy grows like a weed. Rent one building to a Chinaman, and it is but a short period ere the buildings on each side

are also occupied by Chinese.

Mott street and its environing thoroughfares form local illustration of how the Chinese colony will grow. Yet it is but a weak example compared with those that San Francisco furnishes. Once a Chinaman gets a foothold in any quarter, thereafter everything decent is swept away before him, never to return, unless something approaching a revolutionary movement arises to overthrow the destroyer. This is due to the fact that the Celestial is a very undesirable neighbor. He is probably the

this country nourishes.

What formerly was one of the finest and most valuable portions of San Francisco is practically ruined. As the Chinamen lived and live there, so do they live in Mott street. Anyone who cares to try the experiment has but to take a trip through the homes of the Chinamen of Veryovan and Bennett. Umpire—McQuade. homes of the Chinamen of New York to tisfy himself that their manner of living

is detestable and injurious to real estate in-The owners of property in Mott street and other thoroughfares than the neighborhood now tenanted by Chinamen do not pretend that matters are anywhere near approaching the crisis reached on the Pa cific coast. Still the white boycott incident has actuated them to a more serious consideration of the problem than they have ever given before, and there are the signs of wavering real estate values which the white case has served to make more marked. The Post, which is rated as the most conservative paper in New York city, sounds the following alarm: The Chinese have secured a foothold in New York. If it becomes firmer, if the increase in Chinese population continues at the rate of fifteen per cent. as it has in the past year, despite the Restriction Act, what will be the effect on property values? That is a question that ought to trouble landlords.

Should the Chinamen greatly increase and should they pursue, with regard to other property, tactics similar to those adopted in the boycott case, the landlords would be entirely at their mercy. In fact, they are at their mercy now so far as Mot street is concerned. They might drive the Chinese out by a concerted effort, but, in order to secure Caucasian tenants in the vacant places, they would be obliged to renovate thoroughly, even should they not be compelled to tear down and rebuild the entire district.

SHERMAN RE-ELECTED President of the Army of Tennessee at

Cincinnati Yesterday. CINCINNATI, September 26th .- At the neeting of the Army of Tennessee to-day welcoming addresses were made by Mayor Mosby and Governor Foraker. When General Sherman rose to reply everyone in 1:44%. the house cheered, shouted and waved their handkerchiefs until he was compelled to

ignal for order. In the course of his speech General Sherman said: "We fought the holiest war ever fought on God's earth. A larger result was accomplished from that war than from any Cæsarean or Napoleonic war. We made peace on a continent, we raised the standard of our nationality a thousand fold, we lost nothing but slavery. The people of the South lost that. They bet on the wrong card and lost. [Cheers]

"Now they are betting on another card. They consented to an amendment to the Constitution as a sort of concession for not being otherwise punished, and they came back into the Union with a three-fifths rights the Constitution gives them, or the States must be deprived of that proportion of their representation in Congress. [Up-

roarous applause.] "That's the legitimate result of the war, honest and honorable, and the war won't be over until that is done. [Cheers.] Don't unbuckle your waist-belts too much. won't have any fighting, though. Reason will surely master that problem. It isn't so bad as it all seems. It is time that the wisdom of our rulers should handle that proposition. I merely state that it must take its course

LOUISIANA FRAUDS.

State Treasurer Who Used State Bonds for Private Collateral. New Orleans, September 26th.—The statement of the Cashier of the State Treasury during Treasurer Burke's term, that he had called Burke's attention in 1886 to the fact that coupons had been presented of bonds supposed to have been destroyed, was cabled to Major Burke in London.

Burke has replied, telling how the apparent discrepances, might evist and every parent discrepancies might exist, and says he is tied down by his business in London,

but when he can get away will sail for Louisiana. It is understood that Judge Marr will charge the Grand Jury next week to investigate the matter and bring indictments against those found to have been engaged in placing the invalid securities on the market.

Judge Stansbury, who was for some time engaged with Burke in a business capacity, has made a statement showing that he negotiated loans for Burke at different times amounting to thousands of dollars, always depositing as collateral bonds handed him by Burke for that purpose. In comparing the numbers he handled with those now published he finds that among the bonds handled by him there were nearly twenty thousand dollars of them fraudulent. He had no doubt of their validity until the recent disclosures.

Stansbury's statement, which is made on the advice of his attorney, shows that Burke as far back as 1880 was using the bonds then in his keeping as State Treas-urer as collateral in borrowing money for is own use.

The great trouble that land officials have to deal with, they say, is to prevent violations of the law in regard to the entry of imber land, not only in Oregon but in the Northwest generally. By law one person can make only one entry of 160 acres of timber land. Syndicates have been formed and great bodies of timber land, sometimes as much as 50,000 or 100,000 acres purchased by individuals with the understand ing that when they received a patent i would be turned over to the syndicate, which not only furnished the money to the individual to purchase the land, but oaid him also for the use of his name. It is known that the report takes up each rerating case separately, and each case is an exhibit in itself. Stress is laid upon the fact that Deputy Commissione Hiram Smith, Jr., received over \$6,000 as a rerating clerk. This action of his comes in for severe criticism in the report. Whether smith has returned the \$6,000 or not the

Your correspondent had a talk with Secretary Noble this afternoon in regard to Mr. Tanner's intimation that his (the Commissioner's) order for rerating of pensions below \$4 per month up to that amount and his order placing the testimony of the private soldier on the same footing with that of an officer were the source o his trouble in the Department.

Secretary Noble will not speak for pubication, as he will not engage in a contro versy with a subordinate, or any other fficer, and is averse to interviews and newspaper statements generally in times like this. Shortly the report of the com nittee that investigated Mr. Tanner's official acts, and the conduct of his office and the employes under him, in full, will find its way to the public, and that will explain It can be stated that the orders referred to in the Dalzell letter by Tanner had no

They were never referred to by either the President or the Secretary of the Interior in their several talks to the Commissioner, in which the management of the Pension Office was discussed, and these utterances of Mr. cussed by the President and Secretary of the Interior when the management of the Pension Office was by them alone discussed. THE CHARLESTON. Henry Scott Makes two Fair Propos

tions to Secretary Tracy. Washington, September 26th. — Secretary Tracy, Henry Scott and Chief Engineer Melville have had several conferences lately with reference to the acceptance of the Charleston by the Government and what penalty, if any, shall be attached, As the matter now stands, Mr. Scott acknowledges that a penalty exists of \$18,400, but he is averse to paying it, and has offered Americans, their spirit of enterprise, their ecretary Tracy two propositions, viz.: mit the penalty and accept the vessel as it now stands, as the first plan would, perhaps, result in showing the required horse-power. It is not believed that the vessel would make a greater speed, and, therefore, it would only result in putting a strain on the machinery, which is not necessary. Many officers are opposed to the essary. Many officers are opposed to the embedding and look with forces of Sunday is impossible, a weekly holiday should be given to the embedding and look with forces of Sunday is impossible, a weekly holiday should be given to the embedding and the strain of the sunday is impossible, a weekly holiday should be given to the embedding and the sunday in the sunday is impossible, a weekly holiday should be given to the embedding and the sunday is impossible. first proposition and look with favor on the second, and especially as they all feel friendly to the Union Iron Works, who

Reference was yesterday made to the exof a ring fight before one of the athletic disappointment to the spectators, because, after over sixty rounds had been fought, neither man was conquered, nor was either injured. In short, according to the ethics of the ring, it was a "fraud." The President of the club is reported to have entered the ring and driven the pugilists out, exclaiming at the same time, that he was too disgusted to fittingly express himself. The spectators who had assembled to witness a brutal exhibition, and thus gratify the morbid taste that prize fighting caters to, were also loud in their denunciation of the boxers because there was no Elkins, Senator Davis, Mrs. John Miller, slogging, since it was that they had come to see. The club makes a public detame affair in effect, and that there was no slogging. Now it is not denied that there was scientific boxing in plenty by the matched men, and since the claim of these athletic clubs is that they are encouraging the "manly art of self-defense," and are not promoting brutal exhibitions, the position of the club provokes a smile. This is all very amusing, to be sure, since it so neatly strips the mask from these so-called athletic clubs, and exposes them in their true colors as brutal and bloody gangs of men who, through the

But even more ludicrous is the position of the San Francisco Bulletin. Here is a journal that has uniformly and vigorously opposed the slogging match, and anathematized the athletic clubs that promote the brutality. > Daylight Sports and Evening Amusement at Bartlett Springs-Delightful Pleasure Trips.

BARTLETT SPRINGS, September 25th. EDS. RECORD-UNION: No doubt your many readers (especially those who have spent the summer months or weeks at this health-giving resort) incline to the belief that there is little of interest going on hereabouts at this season of the year, as they possibly lean to the opinion that for the time being we who (from necessity or on pleasure bent) still remain here are temon our hands, or that we are busily engaged in building or repairing toboggan slides, in

for a few months. Such, however, is far now prevails at Bartlett Springs cannot be excelled for comfort and the general enjoyment of outdoor sports of all kinds at any given point on the Pacific Coast, and such a condition of things promises to continue until the rainy season sets in for "keeps," which will be about the first of December Nor is there a particle of exaggeration in this assertion. The mornings and even-ings are cool and pleasant, while the days are bright and springlike, with a maximum temperature of 77° and a minimum of 47° during September, October and November, while in the winter months (as per records kept by George W. Yount the year round) the maximum is 70° and the ainimum 34°. Under such a showing i can readily be imagined that Sergeant Barwick would have a "picnic" if he should take a notion to run up here and take a few observations at this season of the year, and it is certain that he would need to look up more weather adjectives than are contained in his "log-book" did he desire to describe correctly the unapproachable and de ightful season which is now upon us, and which is in such marked contrast to that which prevails in many of the valleys

throughout the State.

DAY AND EVENING AMUSEMENTS. And now, as regards amusements, let me tell your readers what they consist of during this season of the year. In anticipation of giving excursions to Clear Lake, the management some three weeks ago secured the services of the Dixon Brass Band, of twelve pieces, and outdoor music is given by them every morning at 9 o'clock and each evening at 5, on which occasion programme of selections is rendered specially chosen to suit the tastes of all, even the religiously inclined—for whose special benefit a sacred concert is given at the Pavilion, within a few feet of he spring, on Sundays. Then, in the venings, a dance is given-one night in the hotel here, and the next night in the skating rink at Newtown, distant about three blocks only, so that no difficulty is experienced by persons whose headquarters are at either place in attending a dance every evening. During the day the time is spent in visiting the different springs on the adjacent hillsides, bathing in the Soap creek plunge baths-some three miles distant, and easily reached by stage-taking vapor baths in what is known as "the gas nnel," killing "rattlers" on the trails, and also in visiting the tunnel, where an effort prove a success, too, as the flow of water keeps increasing as the tunnel is driven into the hillside, so much so that the daily

output now exceeds 5,000 gallons. Occa-DEER HUNTING PARTIES

Are organized, and as a rule they are generally successful, as the noble game can be found within six or eight miles of the springs. As a result, the hotel is enabled to serve venison in all forms three or four times a week, in addition to all the substantials of the season in the way of vegetables, fruit, all kinds of meat, pastry, also fish and fowl, and in fact everything going to make up a good, abundant and substantial meal -just such as is required by those who come here with ailments of the digestive organs, general debility, and in need of a bracing up of the worn-out system, which has been run down by malarial fevers, kidney ailments, rheumatism, and nearly all Le ills which flesh is heir to. And now that the band is here, it is the ntention to have them remain until about the end of the season; and the new road to Lakeport having been opened, a series of excursions to Clear Lake and the various points of interest thereabouts are till here or who may arrive in the future

to be inaugurated, and these cannot fail to contribute to the pleasure of the guests The new road referred to was formally opened to travel last Sunday, and the first tages taking passengers out and bringing them in left on Monday. On Saturday, however, three stages loaded with the band and a number of excursionists drove over the route and returned on Sunday afternoon, after having had a most jolly time and affording much pleasure to the people residing at the various places around the lake. Leaving here at 6 A. M., under the guidance of L. E. ("Ed.") McMahan, under whose supervision the road was constructed, the pleasure-seekers were whirled over the twelve miles in short order to Bartlett's Landing, on the lake. The ride

was a most delightful one, and THE GRAND SCENERY On each side was most favorably con nented upon and enjoyed. At the landing he steamer City of Lakeport (soon to be hanged to the name of "Bartlett" ommanded by Captain Cal. C. McMahan) was taken, and after a trip of eight miles over this, one of the most delightful sheets of water in California, the excursionists reached Lakeport, where a concert was given by the band. A large delegation of people rom the surrounding country was in waitng to receive the visitors, to whom a most hearty welcome was extended. Those on board were then taken to various points of interest about the lake, and a substantial anch was enjoyed at Soda Bay, and a visit was paid to the magnificent summer resort of Captain R. S. Floyd, known as Buckingham Park. Here was met a party headed by Mr. McCreany, of the Lakeport Avalanche, who were on board the steame Freda. Their boat had become disabled. had drifted ashore, and the party were found wandering through the woods in search of signs of human habitation. That such a condition of affairs existed is in keeping with the well-earned reputation of McCreany, who is known as the Hoodoo" of the lake, for the reason that he is accredited with never going out on the water but that an accident is sure to happen-although he has never met with a serious one as yet. Returning to Lakeport another concert was given, after which several steamers and boats, carrying about 150 people, headed again for Soda Springs, where a dance was enjoyed till after mid-

night, and a fine supper partaken of. THE RETURN TRIP TO LAKEPORT Was made without sccident or anything of special interest transpiring. After a refreshing night's sleep, a hearty breakfast and the giving of a concert for the benefit of the Lakeporters, a start on the return trip was made and the party arrived here safely about 3 P. M. on Sunday, all in high glee and with most favorable expression concerning the management and thorough arrangements for their enjoyment. The stages started on regular trips over the new road on Monday last, with the well-known driver Ed. Crawford on the box. The con struction of this road has for some time been contemplated by Mrs. L. blood disease, but is caused by impaired digestion, for which they now give vegetable correctives instead of minerals. Two short testimonials are given to contrast the action of the potash sarsaparillas and Joy's Vegetable Sarsaparilla. Mrs. C. D. Stuart of 1221 Mission street, S. F., writes that she took one of the leading sarsaparillas for indigestion and dyspepsia. Its only effect was to cause pimples to appear on

her face. Upon taking Joy's Vegetable Sarsaparilla the first effect was the disappearance of the pimples and she was subsequently relieved of the indigestion and dyspepsia Robert Stewart also writes from Petaluma, Cal., that being troubled with boils he found that one of the leading sarsaparillas actually increased the eruptions, which responded at once to Joy's Vegetable

The Feather river, in Butte county, Cali fornia, is rich in its deposits of gold, and the north fork of the river, called Big Bend, was always considered particularly rich in the way of gold deposits in its gravelly bed. to these deposits, and about five years ago Dr. Pierce organized the Big Bend Tunnel and Mining Company. The scheme was to divert the stream from its natural bed through a huge tunnel, thus exposing the rich golden deposits supposed to be lying along the bottom of the river. GREAT EXPECTATIONS.

Visions of untold wealth floated before the stockholders, and there never was any difficulty in disposing of the stock as fast as it was offered on the market. The expectations of the shareholders were of the man in America. Every stockholder expected to become a millionaire, but, alas hese dreams have gone to naught, for the bed of the north tork of the Feather river has been drained, and shows far more DR. PIERCE'S CIRCULAR.

Dr. Pierce, President of the Big Bend Parsons of St. Louis as President of the Tunnel and Mining Company, in a circular to the stockholders, announcing the future of the company, says: "Since the issue o bulletin No. 1, on September 29, 1888, there has been no material change in the prospects developed by our mining operations last year at Big Bend. The vas quantity of bowlders uncovered completely handicapped our operations and made them so expensive as to prevent a realiza tion of profit. In fact, in view of the ad verse developments of last season and the California delegation of Knights Templar | work and further experience of this season it is doubtful if our mines ever can be worked at a profit. Certainly not at the ton. It is estimated that at least 350 Knights | present prices of labor, nor unless som more economical method may hereafter be invented for handling the yast quantity of bowlders which exist in the river bed.

> VAST QUANTITIES OF GOLD. "Our operations demonstrated the fact hat there is a vast quantity of gold in our claims, but, in the face of the obstacle mentioned, it seems impossible to extract i

at a profit. "The total output from our mines las eason was \$17,832. This did not pay the cost of actual mining operations. Some of the ground washed was quite rich and everywhere gold was found to exist in suffiient abundance to have paid largely, but for the unexpected obstacles

THINGS RUN ECONOMICALLY. During August of this year, Dr. Pierce says the output was about \$12,500, he adds, "it is doubtful if we shall be able to do much better than pay expenses this season. Everything has been done to operate cheaply and effectively, and every thing else likely to facilitate the work that experience could suggest has been done. In conclusion, he says: "But after our efforts and as much as we regret to but after the Conclave will separate. The company can pay all its debts, if it has any; it is perfectly solvent. It is true our expectations have not been realized in the venture, but we have still yaluable property, some four thousand acres of territory, which can be utilized to advantage for irrigation and other purposes. The operations were carried out as at first planned, with every prospect of success; but the outlook, for the presence of the great bowlders under the sand changed the entire tendency of the venture; and instead of producing gold at a profit, it seems to be a losing operation

> BEST MINING AUTHORITIES. "We had the favorable opinions of som of the best mining authorities in the country, and everything looked favorable for a large return on our investment, but a stated in the circular, we did not find enough gold to pay expenses. Any misstatements are entirely unjustifiable, as the actual condition of affairs has been clearly set forth in the bulletius which have been issued, copies of which have been fur nished for publication. "If the company was in a state of col-lapse, it would be the duty of the Attorney General to close up its affairs."

PURE WATER.

REVIVAL OF THE SCHEME TO BRING DOWN TAHOE'S WATER.

Von Schmidt Proposes to Supply San Francisco, Sacramento and Other Cities With Pure Water.

There is now before the Water Committee of the San Francisco Board of Super-visors, for their consideration, a proposition lease of the land to Nahl for two years. For Lake Tahoe and San Francisco Water Company, to furnish that city with 30,000,000 gallons of water daily from Lake Tahoe for the same of \$15,000,000. The company is the sum of \$15,000,000. The company is ging, as he agreed to, and at about the ex-

made for the company in perfect good faith.

The company is willing to furnish San

Francisco with either 30.000,000 or 60.000.

Peck then commenced suit against Nahl Francisco with either 30,000,000 or 60,000,000 gallons daily. It expected that the city

Peck then commenced suit against Nani
for unlawful detainer, and got judgment
against him for \$260, damages holding over, sary to bring the water to the city, and Mr. (Peck) in possession.

Nahl appealed from the judgment of the Von Schmidt urged that all the pipe used should be made there, to give employment to about five thousand men for a considerable period.

THE GENERAL PLAN. The plan is to bring the water from Lake cluded yesterday, and the arguments will be made on Saturday. Tahoe to a large reservoir to be constructed under the bay to San Francisco. Mr. Hopkins, after giving Cox the money, telegraphed to the Bay to see if the matter was all straight and in reply received a telegram which ran

"Cox is not in our employ. Bad egg."
Mr. Hopkins thereupon had Cox arrested. In Court yesterday Cox explained that he had been working as a sort of inerant drummer or solicitor for over sixty different paper mills, but was at present in the employ of a San Francisco newspaper. He could yet, however, take orders for supplies of paper. He ex-plained that he had been at Hopkins & Bro's, store before and borrowed money, which he promptly returned. In the last transaction (the one on which he was arested) he had told Mr. Hopkins that he did not like to give a draft on the company but the former having prepared the draft he signed it. Writ of Prohibition in the Laguna de Tache Ranch Suit. San Francisco Examiner, Sept. 26th. The famous litigation over the rancho aguna de Tache, comprising 54,160 acres of land in Fresno and Tulare counties. added another avenue to its legal labyrinth yesterday. It came before the Supreme court on the petition of Simon Clayburgh to have an alternative writ of prohibition issued forbidding J. B. Campbell, Superior Judge of Fresno county, from appointing a ecciver in the case and from having any urther judicial connection with it.

The Supreme Court granted the writ and set October 4th as the day when Judge Campbell shall show cause why he should not be perpetually enjoined from presiding over the case. In the meantime all further oceedings are stopped. Judge Campbell was to have appointed a

eceiver to-day.

The points involved in this big land suit an be briefly summarized. Simon Clayburgh, August Heilbron, Adolph Heilbron, Isaac Poly, Celia Clayburgh and S.C. Lillis have possession of the land by virtue of a lease from Jeremiah Clarke, its owner. The lease was made May 1, 1880, and was to run ten years, with the privilege of a renewal for four years and six months. Un der the lease they were to pay an annual rent of \$6,500 and have the right to sell any of the land for \$3 an acre, such purchase money to be paid to Clarke. If more than \$3 an acre could be obtained, the difference was to belong to the lessees. In case of all sales of land the rent was to be proportion-It a renewal of the lease were made, then at its expiration the Crump yesterday made a descent upon a lessees were to have the privilege of buying

> The legality of the lease was contested Judge Campbell, before whom the case was tried, rendered a decision on June 29th last. He decided that the lease was void, on the ground that Clarke was insane, and that the land was worth \$6 an acre, instead of \$3, at the time the lease was entered into. But on account of the improvements made by the lessees he ordered that

they be paid \$154,000 on surrendering the

In his petition for a writ of prohibition Clayburgh gives several interesting reasons for his request. He alleges that at the present time, and during the trial, Judge Campbell owned 257 acres of land that formed part of the Tache ranch, and for which he said he would not take \$50 an acre. He paid a man named J. W. Chisum \$2,000 for it. The other reason given is that in a portion of the ranch and in some cost of \$200,000. Because of this fact they got a legal right to use large quantities of water from the Kern river, and over which they have had troublesome lawsuits with many influential people in Fresno county. These suits engendered such a bitter feeling that, as Clayburgh asserts, it was mainly in trumental in giving rise to the suit to have Clarke's lease declared void. Realizing this alleged popular prejudice, Clayburgh says the lessees wanted a change of venue before the trial began, but Judge Campbel would not grant it.

Yesterday the Collector overhauled eighteen applications for habeas corpus writs, among which four were for the release of women, and concluded that the affidavit of a single Chinaman, praying for the release of his countrymen on the Gaelic, was not sufficient evidence for him to warrant his signing his name to them and allowing the Chinese to come ashore. Not one out of the eighteen was signed by any other person except a Chinaman. Until more satisfactory proof can be given

Heretofore the information furnished by step which the Collector has taken has that the losses will be considerable. spread consternation among the Chinese. There still remain about one hundred that desire to land, but it is a question whether a single one will reach Chinatown. The women seeking release claimed to be

"merchants' wives," but it is a well-known fact that once ashore they will be assigned to the brothels that abound in Chinatown. Collector Phelps thinks that he has taken a correct position in the matter, and before any of the Chinese can travel along the gang-plank and come ashore they will have o establish abundance of proof of a reliato establish abundance of proof of a relia-ble nature that they should be allowed that Franklin and Alfred S. were the starters. privilege, which is something that they have not had to do before.

Garbled quotations from official reports, falsely credited to respectable journals, but really emanating from the advertising department of the Royal Baking Powder Co., have again made their appearance. Extracts from official letters and documents are falsely quoted, and spurious words in-serted to mislead the public and hoist into notoriety an adulterated food product. Cooked-up lies, and stories made out of whole cloth, appearing in an article headed "A Rement Company, are leveling the fine old pines back of El Carmelo Hotel, with a view of making the Plaza an attractive purpose.

The public likes to see fair and open competition, backed up by honest and legitimate advertising. Trickery and fraud will always react upon the trickster. These attempts to throw sand in the eyes of the public are too shallow, and only instil an added interest into the intelligent ving, a Chinese gardener, endeavored to ross the railroad track yesterday just as a reader to find more positive and praiseworthy proofs of

The American Analyst, of New York City, says, in its of two blocks, and when picked up was issue of June 13, 1889: "No Board of Health' has ever officially indorsed the Royal Baking Powder, as its manufacturers state." A careful perusal of the original National Board of Health Bulletin, "Supplement No. 6, page 33," to day. The exercises occupied all forenoon. Addresses were made by State Su-will show quite conclusively that, "without money considereral Chipman and several others. The ations," but in the interest of the United States Government, they indorsed "Dr. Price's Cream Baking Powder as the strongest and purest."

In reference to the report made by the Canadian Government on Dr. Price's Cream Baking Powder, we refer to the Commissioner of the Inland Revenue Department, Ottawa (seat of government), Canada, which will show that Mr. William Saunders, Public Analyst of that Department, gives the preference to Dr. Price's in strength and purity.

A bogus report, purporting to come from the Ohio Food Commissioner, is another brainy (?) concoction of those who take the pay and wear the collar of the Royal Baking Powder Co. This Royal editor would make the public believe that their powder, with its filthy ingredient, ammonia, had been officially indorsed, while, the truth told, Commissioner Hurst, of Ohio, over his own signature, denounces the Royal's report as "a false and garbled statement." Commissioner Hurst adds: "This article (Royal's), pretending to quote, but misrepresenting my official circular, as it did, was a most flagrant abuse of an official paper."

Nothing better than deception can be expected from a company who will foist upon the public, as "absolutely pure," a food preparation which has as its basis that harsh caustic chemical, carbonate of ammonia. The origin of ammonia is filth, decomposed animal and vegetable matter, and yet it is

being used as a leavening power in the Royal Baking Powder. It was decided by the National Food Analysts that Dr. Price's Cream Baking Powder was the one they could recommend to general family use, being free from Ammonia, Alum, Lime and all drug taint.

TEST

Place a can of the "Royal Baking Powder," top down, on a hot stove until heated; then remove the cover and smell. A chemist will not be required to detect the presence of the disgusting drug "Ammonia."

Let Dr. Price's be subjected to the same test, and if it contains Ammonia or any other unwholesome, unclean substance, it can be detected without the dictum of the Royal Company.
